

did you know...

Bundy Refrigeration is a global manufacturing company supplying the world's leading appliance manufacturers, **but did you also know ...**

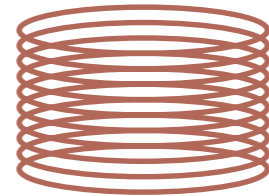

HSEQ is at the **heart** of our **business strategy** and processes.

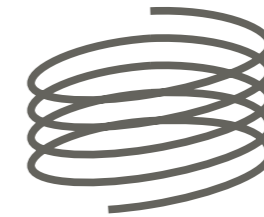

Our commitment to industry quality management systems certifies our **COMPLIANCE** and maintains our **reputation**.

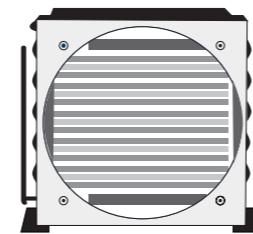

Bundy Italy is **Europe's leading supplier** of high-quality capillary tube for commercial and domestic appliances.

Our Italian tube plant produces over **200** million metres of tube a year.

Bundy Germany is home to our patented energy saving and maintenance free **Aluminium WingTube**, set to transform refrigeration systems in response to the challenges of sustainability.

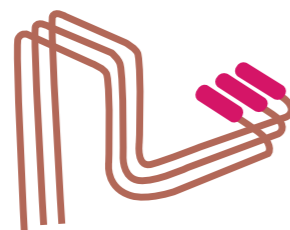

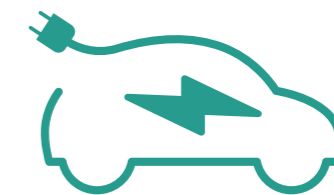

Bundy WingTube **reduces 23%** energy consumption, reducing costs and significantly contributing to net-zero objectives.

Practically every home in Brazil has at least one Bundy component in its refrigerator.

Our team in Brazil has developed an innovative roll bond panel to cool battery packs for **electric vehicles and marine vessels** to support net zero transition.

Our **state-of-the-art facility** in Turkey manufactures half of all the door warmers used in the country's refrigeration sector.

Bundy Turkey produces **80%** of the zinc coated refrigeration tube in the country.

Bundy Hungary is only **17km** from one of the world's leading appliance manufacturers providing them with integrated manufacturing processes and optimised logistics.

Bundy is committed to saving **10%** of its annual energy consumption by 2030.
